Glass Selection Tips

Uroboros Tiffany/Representational Art glass makes it easy to turn your lamp into a valuable work of art. Here are some added glass selection tips to keep in mind.

Light Source First, determine the intensity of the light bulbs that will be in your lamp. Use incandescent light of the same intensity when selecting your glass. This will eliminate surprises and insure that your finished lampshade meets with your expectations. Incandescent light provides the reddest light of common light bulbs. They intensify warm colors, such as red, yellow and orange and also gold containing pinks and purples. Since this light shifts all colors toward red – choose blues and greens carefully! Neodymium sky blues will shift all the way to rosy lavender while non-gold opal pinks and purples will look reddish-brown making them appear dull.

Opacity The terms opacity and density refer to the light dispersing ability or "miliness" of opalescent glass. Lamps generally need higher density opalescence than windows or panels. We design all of our Representational glass styles with a mix of opal as well as transparent colors. In some glasses the transparent colors are subtle, merely a highlight, but their job is to break up incandescent light. This avoids spreading light too evenly and prevents your lamps from looking flat or "plastic looking". Select varying shades of density, mix carefully and your lamp will have an enduring, natural glow.

Textures Textured glasses in your lamps are a must! The original Tiffany Studios' lamps contained everything from Granite to hand-rolled Drapery. Uroboros glass is specially formulated to be easy to cut, so combine our Smooth Ripples, Herringbone Granite Ripples, or any other textured glasses with confidence. By mixing all of our styles together your lamp will be an interesting, sophisticated treasure.

Uroboros Glass Studios wishes to acknowledge the use of the Tiffany Reproduction lampshade line drawings as a courtesy provided by Paul Crist, founder of Odyssey Lamp Systems Inc. These line drawings may not be reproduced without his expressed consent.

Tiffany Samples and Glass Kits

Available Direct from Uroboros Glass Studios:

Tiffany/ Representational Sample Set

Contains all our Tiffany styles, including Ring Mottle, 4 different Ripples, Streaky, Fracture, Fracture/Streamer, Granite, Fibroid and Iridescent. Each sample carefully selected to represent typical color, mix, texture and light transmission. 139 samples, each 2 1/2" x 2 1/2" (does not include Drapery).

Visit our virtual Sample Set on our website, www.uroboros.com and see 1/2 sheet size (15"x24") full color photos of our products.

Studio Apron

With our black and white Dragon logo prominently in the middle, our one-size fits all apron is designed for everyday use. Measures 32" L x 28" W it is 35% lightweight cotton and 65% poly.

Dragon T-Shirts

100% combed cotton T-shirts
Periwinkle blue with our Dragon Logo silhouette against a bright yellow moon.
Full cut available in S, M, L, LX.

White with our Dragon silhouette in black for a dramatic contrast available in Women's slim cut or a Man's full cut. Designate WS, WM, WL or MM, ML, MLX, MLXX.
